

2020 Yamaha 195S Boat

Designed for the premium 19' customer featuring upgraded appointments to include a larger 7" Connex[®] screen with Maps and Wet Sounds[™] Speaker Package.

For 2020, Yamaha's best-selling 19' boat series returns with the exciting addition of the all-new Yamaha 195S, designed for the 19' customer attracted to premium appointments in a compact, high-performance, and easily-managed jet boat package that can be towed behind a mid-size SUV and stored in a standard size garage.

The Yamaha 195S is a complement to Yamaha's "prestige" offerings that include the 21-foot 212S, 24-foot 242S, and 27-foot 275SD models.

Setting the 195S apart from the rest of Yamaha's 19' bowriders are next-level premium appointments, a stylish watersports aluminum tower featuring a CNC embossed logo on the structure, a larger 7" Connex control system with maps, and an upgraded Wet Sounds[™] speaker package. Also included is premium Marine Mat flooring, a co-captain chair, docking lights, and a Fusion[®] Audio stern stereo remote.

Powering the 195S is Yamaha's award-winning 1.8L Super Vortex High Output marine engine that also powers the returning AR195 and SX195. This Yamaha marine engine is powerful, fuel-efficient, and renowned for its reliability and durability.

Upgraded Hull and Deck

The hull and deck of the 195S is a new design introduced to Yamaha's 19' boats in 2019, which is 3" longer and 2" wider than previous year models.

With the added space, Yamaha engineers reimagined passenger flow from bow to stern to create the most spacious, most comfortable experience ever in a 19' family runabout boat.

Under the waterline, the longer, wider hull is designed for added comfort too; favoring characteristics that reduce bow rise when accelerating, and hull packing when operating in choppy water conditions.

Other significant improvements included on the 195S, and shared across the entire Yamaha boat line, is a V-shaped reverse bucket that enhances handling when in reverse, a redesigned Articulating Keel that reduces drag, and a complement of corrosion resistance measures to protect the jet pump and surrounding driveline parts.

The V-Bucket works by diverting water thrust laterally (not down) to take advantage of the benefits of side thrust. The Articulating Keel is thinner with tighter tolerances to reduce drag while maintaining all its low-speed handling benefits.

And to increase corrosion resistance to the jet pump and surrounding driveline parts, a three-step process that combines Alumite, a ceramic coating, and epoxy paint has been added.

Yamaha's Spacious 19-foot Deck Layout

Starting at the bow, there is a wide walk-through into the cockpit for adults. Three adult passengers can sit comfortably in the bow seating with plenty of space to lounge out. Completing the bow is an under-the-seat anchor locker, conveniently located beverage holders, and integrated grab handles. And of course, there is plenty of storage underneath the hinged bow port and starboard seating.

Moving into the cockpit, the 195S helm features Yamaha's 7" Connex[®] control system based on the same graphical user interface as Yamaha's 12.3" Connex system. This is an upgrade compared to the 4.3" Connex touchscreen shared across the rest of the Yamaha's 19' boats.

Also located at the helm is the sound system controls, an AUX/12v power inlet, and a mobile device holder that swivels to a landscape or portrait position. Finishing the helm are conveniently placed rocker switches for Yamaha's No Wake Mode[™] and Cruise Assist, along with the bilge, horn, and other vital functions.

Cockpit seating and storage is carefully thought out to improve egress and ingress to the stern lounge area. To do this, Yamaha designers created a larger step in front of the walkthrough transom (includes removable seat cushion) and lowered the height of the walkthrough transom itself.

Port and starboard seating in the cockpit is seven-inches longer than 2018 and prior year models; allowing taller passengers to stretch out more comfortably. And with the added length comes added space under each seat.

The padded port console is wide to offer more space for food preparation and more, and the door to the port storage is angled to make entry into the bow even more wide.

To maximize space and efficiency, the area aft of the captain's chair provides seating with extra leg room, a storage area for cooler, and a table mount. Spin the captain's chair around and the cockpit of the 195S transforms into the perfect entertaining area.

Wrapping the cockpit are premium windows and window frames that give these 19' boats a more luxurious look and feel.

Yamaha's Signature Stern Lounge area and Swim Platform

One of the favorite features of all Yamaha boats is Yamaha's signature stern lounge area and swim platform that sits just above the waterline. The padded swim platform comes with integrated beverage holders, perfect for hanging out at your favorite cove.

For 2020, the stern features a brand new retractable stern ladder that's easier than ever to lock in place after use.

For the 19' boat buyer that wants a more premium experience in a boat that's easy to tow and store, look no further than the new Yamaha 195S.

2020 195S SPECIFICATIONS

Engine Type:	Single supercharged 1.8L Yamaha marine engine
Displacement:	1812cc
Impeller:	3 blade, stainless steel
Length:	19'5"
Beam:	8'2"
In Water Height:	7' 6"
Dead Rise:	18°
Fuel Capacity:	40 gallons, regular unleaded fuel
Person Capacity:	8 persons, 1,600 lbs
Storage Capacity:	422 gallons
Assembled:	Yamaha Jet Boat Manufacturing U.S.A. Inc, Vonore, Tenn.

About Yamaha WaterCraft Group

Yamaha boats are products of the Yamaha WaterCraft Group, a division of Yamaha's U.S. Marine Business Unit. Headquartered in Kennesaw, Georgia, the Yamaha WaterCraft Group is responsible for the sales, marketing and distribution of Yamaha boats in the United States. Yamaha boats are proudly assembled in Vonore, Tennessee. For more information, please visit www.YamahaBoats.com.
