

2022 Yamaha FX® Series WaveRunners®

Featuring an all-new, full-featured infotainment system, premium factory-installed audio speakers, and enhanced handling and comfort.

Highlights:

- Enhanced infotainment system features a 7" color touchscreen on SVHO models and a 5" color touchscreen on HO models; provides audio controls, phone and text notifications, and GPS-ready mapping, and enhanced Drive Control function
- Premium, factory-installed audio speakers come standard on FX Limited SVHO; optional on all other FX Series models.
- New, larger glovebox with a smartphone holder 12V outlet, USB, and LED lighting.
- Enhanced Drive Control limits top speed, sets acceleration modes and controls Auto Trim for performance or comfort riding.
- New steering column design includes sleeker handlebars, one-button start/stop, and two tie-up points.
- New ride plate design and sponson location reduce hull packing and bow spray.

The best-selling luxury-performance personal watercraft series returns with significant enhancements that further distance the Yamaha FX Series from its competition. New features include a 7" or 5" full-featured infotainment system with a glass color touchscreen, premium factory-installed audio speakers, and Drive Control with Auto Trim that allows the operator to set and save preferred trim modes for performance or comfort riding.

For 2022, the FX Series includes the flagship FX® Limited SVHO®, FX Cruiser SVHO®, FX SVHO®, FX Cruiser® HO, and FX® HO. SVHO models are powered by Yamaha's Supercharged 1.8L Marine Engine, while the HO models are powered by Yamaha's 1.8L normally-aspirated motor. Both engines are renowned for their performance, reliability, and durability.

All-new 7" and 5" Connex Infotainment System with Color Touchscreen

The most noticeable update to the FX Series is the new Connex® Infotainment system that is available with a 7" color touchscreen on SVHO models and a 5" color touchscreen on HO models. Not only are these touchscreens larger, but they offer better touch sensitivity, and higher vibrancy and visibility in direct sunlight.

Both systems feature GPS-ready mapping with geo-fencing. GPS map cards are sold separately and available through Yamaha WaveRunner dealers.

With the optional GPS map card installed, the operator can add and follow GPS waypoints, record and follow tracks, and geofence the riding area where the watercraft can be operated. With geofencing activated, fence distance and distance from center can be set to create an audio warning telling the operator that they have ridden too far.

The touchscreen is made of glass, offering higher vibrancy and better visibility in direct sunlight. This new Connex system features complete audio connectivity through the rider's smartphone. Riders can receive incoming phone calls and view incoming text message notifications on the Connex screen. The rider can also use voice assistant to make phone calls using the voice command button and integrated microphone, conveniently positioned just below the steering column and to the left.

Also, there is a new Drive Control functionality that allows the operator to set and save different trim modes for performance or comfort, set top speed limits, and designate preferred acceleration curves.

Factory-Installed Integrated Speaker Option

For the first time, the FX Series is available with factory-installed, custom integrated audio speakers. The package includes twin, 4.5" waterproof marine speakers, an integrated two-channel amplifier, an easy access control pad, and an integrated low-voltage regulator to protect the battery.

Audio played through the speakers is controlled through the Connex touchscreen, connected to the rider's smartphone. The audio package comes standard on the FX Limited SVHO, and as a factory-installed option on all the other FX series models.

New Large Capacity Watertight Glovebox

A significant enhancement to the FX Series deck is the new larger capacity, watertight glovebox that includes a dedicated area for a smartphone, a USB port, a 12V power outlet, and LED lighting. Also, the latch to the glovebox cover is improved for smoother opening and closing.

New, Sleek Handlebars and Steering Column Design with Integrated Rope Hooks

Another upgrade above the waterline is a sleek, ergonomic handlebar and a new steering column design that includes integrated rope hooks for added convenience.

The control boxes are smaller and less intrusive that now feature a one-button stop and start design.

Finishing the handlebars are Yamaha's RiDE dual throttle controls. RiDE is the most intuitive driving experience on the water. Squeeze the right handlebar throttle lever to go forward. Squeeze the left lever for reverse. At speed, the left handlebar lever will slow down the watercraft. Release both levers, and the watercraft is in neutral.

RAM® Multi-Mount System to Support New Accessories

All FX WaveRunner decks come standard with Yamaha's Multi-Mount System to support a new range of accessories (including RAM mounts). These accessories include a cup holder, ECOXGEAR® Waterproof Wireless Bluetooth® Speakers, and Garmin® Striker™ GPS Fish Finder w/ Transducer.

The flagship FX Limited SVHO comes standard with an accessory package that includes a single-rider tube, tube inflator, tube holder, tow rope, soft-sided cooler, 12V outlet, matching cover, and two fenders. In addition, the FX Limited features an Accessory Tech Package that includes two factory-installed speakers, Garmin® Striker™ GPS Fish Finder w/ Transducer, and RAM® Mount Hardware.

Reduced Bow Spray and More Comfort

The FX Series is designed for versatility and adventure due to its superior ultra-lightweight, performance hulls. You can fish, tow watersport tubes and wakeboarders, and venture out into open waters on extended cruises. To make the ride even more responsive and comfortable, the hull sponsons for 2022 are moved forward 50mm to reduce hull packing, and a new modified ride plate reduces unwanted bow spray in all water conditions.

Yamaha Super Vortex High Output (SVHO) Marine Engine

The FX Limited SVHO, FX Cruiser SVHO, and FX SVHO get their name from the Yamaha Super Vortex High Output Marine Engine that delivers more power and torque than any other Yamaha WaveRunner engine.

The SVHO engine features a high-performance intercooler, increased supercharger air intake capacity and boost, and a modified fuel injection system for increased fuel flow. Under the waterline, the SVHO engine is matched with a 160mm eight vane pump for maximum thrust volume.

Industry-leading Fit and Finish

And like all world-class luxury vehicles, the quality, craftsmanship, and overall styling are nothing less than stunning. The FX design combines symmetry, balance, and sleek flow made possible by Yamaha's strong, durable lightweight hull material and closed molded manufacturing process.

This process creates smooth, exact parts every time. There are no ribs or structural inconsistencies that show through the finished product. The result is a deep, luxurious look that no other manufacturer can match. New colors for 2022 include Mint Green available on FX HO models and Titan Blue available on the FX SVHO.

2022 FX Series Models:

FX Limited SVHO

- The flagship of the FX Series.
- Comes standard with an Accessory package that includes a Single-Rider Tube, Tube Inflator, Tube Holder, Tow Rope, Soft Sided Cooler, 12V Outlet, Matching Cover, and two Fenders.
- Features an Accessory Tech Package that includes two factory-installed speakers, Garmin® Striker™ GPS Fish Finder w/ Transducer, and RAM® Mount Hardware.
